THE MAP

The map contained in this Mining Directory is the only complete map ever published showing all the various roads and by-paths leading to the mines. All the roads are passable and open to travel. They are printed in red and can be easily followed.

This map has been drawn accurately as to scale and location. Should there be any errors or omissions, no liability or responsibility is assumed by any of the parties responsible for its production. Every effort, however, has been made to give to the District a handy pocket reference map of real value.
